SWARM ROBOTICS · HANDS ON

Drive a real robot with your phone

Six e-puck2 swarm robots are waiting. Two scans and you're in control.

1 Join the robot WiFi

Point your phone camera at the code and tap to join.

NETWORK	**RoboticsLab**
PASSWORD	**EpuckRobot**

This network has no internet. If your phone asks, choose **Stay connected**, and turn off mobile data if the page won't open.

2 Pick a robot and scan its code

Match the number on the robot. Each code opens that robot's remote control.

Robot 1 — e-puck2

192.168.0.111

Robot 2 — e-puck2

192.168.0.113

Robot 3 — e-puck2

192.168.0.114

Robot 4 — e-puck2

192.168.0.115

Robot 6 — e-puck2

192.168.0.118

Robot 12 — e-puck2

192.168.0.112

At the University of Namur, e-puck2 robots are used to study how simple robots cooperate and decide together as a swarm.
